Hi! I'm David González Durán, recently graduated in Universidad de Granada. Enthusiast of Machine Learning, specially as applied to **Computer Vision** and **Data Science**. I'm looking to start my career in a environment that allows me to develop challenging projects using **state-of-the-art technology**. I am motivated by the versatility of machine learning, enjoying process of exploring and applying these models in new fields. I am not afraid to dive into other areas of knowledge to make AI not just a promise, but a tool for **solving complex real-world problems**.

🎓 ACADEMIC BACKGROUND

2019 - 2026 | **Joint Honours Degree in Computer Engineering and Business Management in Universidad de Granada**
Average score of 8.01 in Computer Engineering and 8.36 in Business Management

💼 WORK EXPERIENCE

July-October 2024 | **Junior Data Engineer (Extracurricular internship), CÍVICA SOFTWARE, Granada – Spain**

- Database management in **Teradata** and **Snowflake**.
- Use of **Informatica Powercenter** for ETL processes.
- Drafting and maintenance of technical documentation on projects, ensuring clarity and traceability of processes with **Microsoft Word**.
- Development of statistical reports for KPI monitoring with **Powerpoint** and **Power BI**.

📖 PROJECTS

FINAL DEGREE PROJECT (2025)

Quantification of the uncertainty in machine learning model predictions for biological profile estimation problems

In collaboration with Panacea Cooperative Research. Supervised by Pablo Mesejo Santiago and Javier Venema Rodríguez.

- Access and management of academic information (more than 100 references including books, articles and websites).
- Analyze and synthesize information for an academic project.
- Implement of uncertainty estimation techniques for Machine-Learning applications based on academic articles with **Pytorch**.

🌐 LANGUAGES

Spanish	Native
English	Upper Intermediate (Cert. B2 Cambridge)

💻 IT SKILLS & TOOLS

ML & Data Research	Advanced	Pandas, Polars, Matplotlib, Plotly, Scikit-Learn, Pytorch, Tensorflow, Hugging Face
Computer Vision	Advanced	OpenCV, Pillow, and ML tools mentioned
Database Engineering and Analytics	Intermediate	Snowflake, Teradata, Informatica Powercenter, PowerBI
Technical Communication	Advanced	LaTeX, typst, Quarto, Microsoft 365
Software Engineering	Basic	Git, GitHub, Docker

+ FURTHER INFORMATION

- Registered in **Plan de Garantía Juvenil (contratación bonificable)**.
- **Served as secretary in DEIT** (Student Council of the School of Computer Science and Telecommunications) for two years. My duties included: convening plenary sessions, drafting and publishing minutes, updating the census and helping to organise events in conjunction with the school management.
- **Referenced by Pablo Mesejo Santiago** (see his recommendation letter on my website), professor at University of Granada and co-founder of Panacea Cooperative Research.
