Hi! I'm David González Durán, graduated in Universidad de Granada. Enthusiast of Machine Learning, specially as applied to **Computer Vision** and **Data Science**. I'm looking to start my career in a environment that allows me to develop challenging projects using **state-of-the-art technology**. I am motivated by the versatility of machine learning, enjoying process of exploring and applying these models in new fields. I am not afraid to dive into other areas of knowledge to make AI not just a promise, but a tool for **solving complex real-world problems**.

Education

2019 - 2026 | **Double Degree in Computer Engineering and Business Management in Universidad de Granada**
Average score of 8.01 in Computer Engineering and 8.36 in Business Management

Job Experience

July-October 2024 | **Data Engineer (Extracurricular internship), Cívica Software, Granada – Spain**

- Database management in Teradata and Snowflake.
- Use of Informatica Powercenter for ETL processes.
- Drafting and maintenance of technical documentation on projects, ensuring clarity and traceability of processes.
- Development of statistical reports for KPI monitoring.

Teradata | Snowflake | Microsoft Word | Microsoft Powerpoint

Projects

Final Degree Project (2025)

Quantification of the uncertainty in machine learning model predictions for biological profile estimation problems

In collaboration with Panacea Cooperative Research. Supervised by Pablo Mesejo Santiago and Javier Venema Rodríguez.

- Access and management of academic information (more than 100 references including books, articles and websites).
- Analyze and synthesize information for an academic project.
- Implement of uncertainty estimation techniques for Machine-Learning applications based on academic articles.

LaTeX | Git | Pytorch | Jupyter Notebook

Languages

Spanish	Native
English	Intermediate (B2)

IT skills

Python	Advanced
SQL	Intermediate
C++	Advanced
Linux Ecosystem	Intermediate
LaTeX & typst	Intermediate
Microsoft Office	Advanced

Toolbox

ML Frameworks	Scikit-Learn, PyTorch, Tensorflow, ONNX
Data Manipulation and Visualization	NumPy, Pandas, Polars, Matplotlib, Seaborn, Plotly
Python Notebooks	Jupyter, Marimo

Interests

DataViz:	Focused on advanced exploratory data analysis (EDA) and the design of visualisations that help us understanding data.
Trustworthy AI:	Interested in uncertainty estimation and explanaible AI to build trustworthy systems and ensuring robustness in environments where reliability and risk quantification are paramount.

Further information

- Registered in **Plan de Garantía Juvenil (contratación bonificable)**.
- **Served as secretary in DEIIT** (Student Council of the School of Computer Science and Telecommunications) for two years. My duties included: convening plenary sessions, drafting and publishing minutes, updating the census and helping to organise events in conjunction with the school management.
- **Referenced by Pablo Mesejo Santiago** (see his recommendation letter), professor at Universidad de Granada and co-founder of Panacea Cooperative Research.
